

PYTHIAN SOLUTIONS FOR GOOGLE CLOUD

Infrastructure Modernization: SAP and Google Cloud

Future-proof your business by leveraging Pythian's deep SAP workload migration, end-to-end managed services, and big data analytics expertise combined with the power of Google Cloud.

Optimize your SAP business applications, scale quickly, and leverage next-generation technology, freeing your business to enable advanced analytics and industry-leading machine learning capabilities. Expedite business insights to meet customer demands without breaking a sweat with SAP on Google Cloud. Google Cloud helps SAP enterprises crush their business objectives via SAP-certified and highly available infrastructure, automated templates for lightning-fast deployments, readily available AI/ML tools, and powerful big data analytics.

Business Continuity

Google's private fiber network provides low latency and high availability, disaster recovery, and secure (SAP-certified) infrastructure meaning you spend less time dealing with infrastructure and more time growing your business. In addition, you can continue to use your existing Business Continuity and Disaster Recovery (BCDR) tooling.

Effortless Scaling

Virtualized architecture lets you resize Google Cloud's SAP-certified VMs as required, so you're never caught flat-footed during high growth periods or have to pay for services you don't need.

Lower TCO

Save 30-60% in SAP operating costs compared to on-prem deployments through a flexible, predictable pricing model and lower TCO. Take advantage of Google cloud acceleration funding programs to cover migration costs.

Accelerated Agility

Automate the deployment of Google Cloud infrastructure with Cloud Deployment Manager. Bring all your SAP and enterprise datasets into BigQuery and create/execute ML models for better business decisions.

¹ "The Total Economic Impact of SAP on Google Cloud: Cost Savings and Business Benefits Enabled by SAP on Google Cloud," Forrester (July 2020).

You can rely on Pythian expertise and proven processes to ensure the success of your SAP migration to Google Cloud, SAP on Google Cloud managed services, and SAP big data analytics on Google Cloud.

SAP Migrations

Simplify and accelerate the migration of SAP environments, minimize downtime with Google Cloud’s Live Migration, leverage Google funding programs to cover migration costs, and lean on our rich experience from dozens of successful migrations.

Managed Services

Keep mission-critical systems up and running with meticulous site reliability engineering, white glove support, and no-downtime infrastructure upgrades.

Big Data Analytics

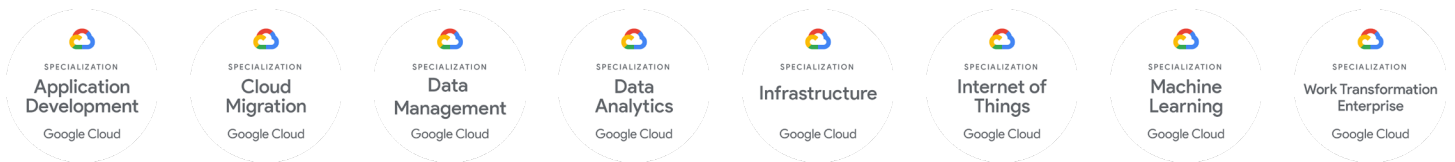

Analyze all SAP and non-SAP data quickly and at the petabyte scale, complemented by integrated AI/ML technologies, BI, data visualization and advanced analytics.

About Pythian & ManageServe

Pythian is an SAP and Google Cloud Premier Partner whose hundreds of IT and data professionals help companies compete and win in the cloud-driven data economy. We’ve also recently acquired **ManageServe**, a technical leader in enterprise hosting and managed services.

- Google Cloud Premier Partner with 200-plus Google Cloud certifications.
- SAP integrations using service-oriented architecture (SOA), electronic data interchange (EDI), Application Link Enabling (ALE), Remote Function Call (RFC), and IDOCS.
- SAP HANA expertise including hardware sizing; DB security, setup and admin; performance tuning on single and multi-node SAP landscapes; DR setup and maintenance; specializations in SAP applications and SAP Customer Data Platform.
- ManageServe is a SAP PartnerEdge program partner and SAP-certified application hosting services provider.
