

PYTHIAN SOLUTIONS FOR GOOGLE CLOUD

# Oracle to Google Cloud Migration Assessment

## Data Management - Enterprise Database Migration

Pythian can help you migrate from Oracle to the best Google Cloud technologies suited for your needs, including Google Cloud SQL, Google Cloud Spanner, Google BigQuery or even Google's new Oracle Bare Metal Solution. Migrating from Oracle to Google Cloud can provide many benefits—from lower costs to improved scalable performance, and the ability to integrate new technologies that drive automation and innovation.

A successful Oracle migration with no disruption requires an end-to-end approach, with a team of both Oracle and Google Cloud experts. Pythian's global team of certified Oracle and Google Cloud services professionals have decades of experience in these environments. We leverage our expertise to help you maximize your migration throughput and mitigate risks while providing the most fitting solution for your business.

## How it works

In a week-long discovery exercise, we will review your Oracle implementation and plan, create, and present our assessment of the work to move your workloads from Oracle to Google Cloud through the following steps:

### 1. Analysis

Pythian's seasoned Oracle DBAs use a proven approach to analyzing your existing Oracle database and related environment to determine the level of technical difficulty of the migration. Analysis includes a thorough review of components and features being used, database objects, database resident code, dependencies on external objects, relative data volumes, etc.

### 2. Roadmap Creation

A database migration path is then formally created and captured in a Database Migration Roadmap document which details the work effort including the high-level migration strategy, future state architecture, required players, areas of complexity, risk, estimated migration timelines, required database outages, and high level estimated cloud consumption costs.

### 3. Recommendations

Pythian presents the findings through a collaborative and interactive walkthrough of the Database Migration Roadmap, readying your organization for an immediate next step.

## Why Pythian for Oracle to Google Cloud Migrations?

Pythian's global team of certified service professionals have deep Oracle, Google Cloud and other related expertise, as well as decades of experience in these environments. We leverage our skills and knowledge to help you maximize your migration throughput and mitigate risks while providing the most fitting solution for your business. Pythian migrates you through the optimal path, using a tested and trusted staged migration approach to effectively move your Oracle workloads to Google Cloud.

- 24+ years of Oracle experience
- Google Cloud Certified experts
- Satisfied database and data warehousing customers
- A strong focus on business outcomes as well as technology
- Recipient of the Google Cloud Data Management Partner of the Year Award for 2020
